

HEALTH RESCUE WORK- SHOP 25TH OCTOBER 2008 @ BUNNINGS DANDENONG

With the support of our GPs and Practice Nurses, as well as a great turn out from many of our staff, it was a successful day for all involved in promoting health awareness. With limited space and time consuming cholesterol testing, all those involved managed to run a smooth operation whilst keeping participants at ease and maintaining their privacy where needed.

Participants were provided with their height, weight, total cholesterol, BMI, Diabetes risk assessment score, waist measurement and valuable advice from our diabetes educator, dietitian and our GPs.
